Table of contents

1 Executive Summary 5
1.1 Assessment Model . . . 5
1.2 Reference Points, Stock Status, and Projections . . . 5

2 Introduction 6
2.1 Management History . . . 6
2.2 Fishery Descriptions . . . 6
2.3 Ecosystem Considerations . . . 6

3 Data 7
3.1 Stock ID . . . 7
3.2 Life History . . . 7
3.3 Landings . . . 7
3.4 Indices and Standardization . . . 7
3.5 Composition Data . . . 7
3.6 Absolute Abundance . . . 7
3.7 Environmental/Ecosystem Indicator Data . . . 7

4 Assessment 8
4.1 Current Modeling Approach . . . 8
4.2 Configuration of the Base Model . . . 8
4.3 Modeling Results . . . 9
4.3.1 Parameter Estimates . . . 9
4.3.2 Recruitment Estimates and Deviations . . . 9
4.3.3 Model Fits . . . 9
4.3.4 Model Diagnostics . . . 9
4.4 Sensitivity Analyses . . . 10
4.5 Management Benchmarks . . . 11
4.6 Projections . . . 12

5 Discussion 13

Taylor, I.G., V. Gertseva, N. Tolimieri. 2023. Status of the Petrale sole stock off the U.S. West Coast in 2023. NOAA Fisheries Science Center, Seattle, WA.

1 Executive Summary

1.1 Assessment Model

1.2 Reference Points, Stock Status, and Projections

2 Introduction

Testing adding in an introduction for Petrale sole. There is currently no read of parameters for child documents.

2.1 Management History

2.2 Fishery Descriptions

2.3 Ecosystem Considerations

3 Data

3.1 Stock ID

3.2 Life History

3.3 Landings

3.4 Indices and Standardization

3.5 Composition Data

3.6 Absolute Abundance

3.7 Environmental/Ecosystem Indicator Data

4 Assessment

4.1 Current Modeling Approach

4.2 Configuration of the Base Model

4.3 Modeling Results

4.3.1 Parameter Estimates

4.3.2 Recruitment Estimates and Deviations

4.3.3 Model Fits

4.3.4 Model Diagnostics

4.4 Sensitivity Analyses

4.5 Management Benchmarks

4.6 Projections

5 Discussion

Here is a use of an in-text reference to a key quantitiy such as target spawning biomass as 5.51571 kgs.
